Overall, I am satisfied with the TA's performance in this class.	22 92%	2 8%	0 0%	0 0%	0 0%	4.9	0.3	5.0	24

Please provide additional comments. These comments are a valuable part of your evaluation of the Teaching Assistant.

LOVE him!

Pretty awesome TA but it gets rather confusing when your TA is teaching a problem in a specific way while your Professor taught it in a different way.

I appreciated Kayden so much and thought he did a wonderful job as a TA. I learned so much from him and would not be doing as well as I am in the class without his helpful discussions and office hours.

So helpful!! Finds alternative and outside the box ways to explain course material. Best TA I've seen.

He is great! He is very patient and open to suggestions. I like how in the beginning of class, he asks us to vote on topics to cover; this makes the discussion relevant and most beneficial to the students in that specific section.

The TA did a very good job helping us understand the material. He showed us many real world examples and he did a good job clarifying confusing topics.

Kayden is a very engaging and helpful TA! He frequently brought props (sliced fruits, cat toys, etc.) to discussions to help us better understand and visualize math concepts. :)

I really enjoyed having Kayden as my TA, as he was able to clearly explain difficult concepts that was very friendly to students who were just learning the material, and the examples he gave using tangible objects was very helpful in understanding the material.

Does a good job of explaining math concepts and problems while also taking into account what the students want to focus on.

Kayden has been a wonderful TA and I am very grateful I was in one of his sections! He usually clears up my confusion with concise explanations and accompanying examples. He even brings objects from home to portray concepts in a more visual manner! For volume of irregular objects, he brought two squash to demonstrate how adding the volumes of a bunch of discs (cut-up squash) can result in the volume of an irregular object (whole squash). These examples greatly strengthened my understanding of this course.

Very knowledgeable TA. Very kind and his discussions are organized very well.
